

Getting you back to your life following injury or surgery.

If you or someone you know has had surgery or an orthopaedic injury and needs physical therapy, we can help you reach your optimal function so you can get back to the business of living your life.

Effective care for injury & post-op rehab.

The caring, highly capable physical therapists at Colorado Injury Treatment Center (CITC) use a combination of positive motivation and hands-on therapies to help you make the most complete recovery possible. In addition to treating work, sports, auto and personal injuries, we provide informed experienced care for recovery from orthopaedic surgeries, including:

- Knees (ACL, meniscus, etc.)
- Feet & ankles
- Shoulders (rotator cuff, etc.)
- Wrists & elbows
- Hips (e.g. joint replacement)
- Spine (laminectomy, etc.)

Therapies custom-suited to your needs.

At CITC, we approach your rehabilitation on an individual basis, focusing on your unique needs. With experience and advanced training, we help you develop and enhance the skills you need to live normally, work productively, function optimally and continue improving after your therapy is complete. Our goal is simple: to get you back to your life as soon as possible and with the least chance of injury.

Making your recovery convenient... & successful.

As part of our commitment to you, we provide custom therapies in a relaxed, unrushed and supportive atmosphere. Plus, our licensed, highly capable physical therapists — and never an aide or assistant — work with you directly. We also do everything we can to make your time with us comfortable and convenient.

Individualized, compassionate and multidisciplinary care designed for results.

For more information about our postoperative physical therapy programs, don't hesitate to give us a call. **(303) 745-0803**
